- There was a productive discussion of the course contents and its teaching.
- It was noted that one or more of the textbooks had new editions in the market. But since teaching has already begun, it was agreed that any new edition would be incorporated into the syllabus only from the following year.
- A few changes were made to the existing syllabus. This included a chapter from Brealey and Myers in Section 1, and a subsection on the Efficient Market Hypothesis in Section 3.
- All revisions are reflected in the attached syllabus.
