Details of the teachers who attended the meeting

- The course meeting was scheduled on 4th May 2016 and the above-mentioned faculty members of different colleges participated.
- Minor changes were recommended in the meeting unanimously. However, everybody further suggested exchanging discussions before the participants confirm.
- The suggestions were made to find more suitable and conceptual papers for the initial units of the course, to cut down relatively old materials and find contemporary articles.
- Mainly, it was decided in the meeting that the teachers will read, and then confirm the reading list and other related adjustment in the lecture hours.
- An email group was set up to discuss the same. All have participated in the discussion and the final outcome has been recommended here.
  - Unit 1: Chapter 2 of William (1999) is recommended as background reading for the instructors. HDI technical note on measures of health and education is added. Vogl (2014) is also added.
  - Unit 4: Deaton (2010) paper is added. Ghosh and Spears (2014), Panagariya (2013), and Jayachandran and Pande (2013) are added to background readings for the instructors. Number of lectures is reduced to 5 for this unit.
  - Unit 5: Number of lectures is 20.
  - Unit 6: Number of lectures is 5.

Course Description
The importance of education and health in improving well being is reflected in their inclusion among the Millennium Development Goals adopted by the United Nations member states, which include among other goals, achieving universal primary education, reducing child mortality, improving maternal health and combating diseases. This course provides a microeconomic framework to analyze, among other things, individual choice in the demand for health and education, government intervention and aspects of inequity and discrimination in both sectors. It also gives an overview of health and education in India.
Course Outline

1. **Role of Health and Education in Human Development** Importance in poverty alleviation; Health and Education outcomes and their relationship with macroeconomic performance

2. **Microeconomic foundations of Health Economics** Demand for Health; Uncertainty and Health Insurance Market; Alternative Insurance Mechanisms; Market Failure and rationale for Public Intervention; Equity and Inequality

3. **Evaluation of Health Programs** Costing, Cost Effectiveness and Cost-Benefit Analysis; Burden of Disease

4. **Health Sector in India: An Overview** Health Outcomes; Health Systems; Health Financing

5. **Education: Investment in Human Capital** Rate of Return to Education: Private and Social; Quality of Education; Signalling or Human Capital; Theories of Discrimination; Gender and Caste Discrimination in India

6. **Education Sector in India: An Overview** Literacy Rates, School Participation, School Quality Measures

*************************************************************************
It was agreed that the same exam format as last year would be followed. The format is given below:
1) Final Exam Format: There will be 8 questions, of 15 marks each and students need to attempt 5 out of these. Each question will have at least two sub parts, and at least some of the questions will straddle across modules so that no module is completely excluded from the final exam. Most questions should be of a technical nature and essay time questions should be avoided.
2) Internal assessment: 5 marks for attendance, 10 marks for a written class test. The remaining 10 marks left to the discretion of the college (either a class test or project work).
*************************************************************************
It was also decided to hold another meeting sometime in October, to take stock of how the course was progressing in different colleges.
