Lecture notes

An introduction to non-cooperative game theory

Manuel Arellano

A non-technical introduction to applied quantile regression analysis including empirical examples

A survey that brings together a historical perspective with recent developments.

The authoritative monograph on the statistical and computational foundations of the subject.

Participants interested in more advanced readings can sample some of the source papers for the ideas and tools that will be covered in the lectures:

Quantile treatment effects

Quantiles and panels

Quantiles and sample selection

John Leahy

Readings for Lecture on Rational Inattention

Readings for Lecture on Robust Control

Hansen, Lars Peter and Thomas Sargent (2001), Acknowledging Mis-specification in Macroeconomic Theory, Review of Economic Dynamics 4, 519-535.

Readings for Lecture on Endogenous Beliefs

Caplin, Andrew, and John Leahy (2018), Wishful Thinking, Working paper.
