The members agreed on the following:

1. The Reading List for the course was fixed. Chapters 1 to 9 (in their entirety), and Chapters 12 to 14 with the following exclusions comprise the reading list. Exclusions: 13.3 (determinants of order n), 14.4 (eigenvalues), 14.5 (diagonalization), 14.6 (spectral theorem for symmetric matrices).

2. The 4 Units of the course will carry the following weights:

Unit I (preliminaries): 10%.

Unit 2 (functions of one real variable): 45%.

Unit 3 (single-variable optimization): 20%.

Unit 4 (linear algebra): 25%.

3. There was a fairly wide-ranging discussion on a variety of issues, including the nature of the final exam.
