MATHEMATICS

Part I Examinations—1979

Paper I—(i) ALGEBRA :

Duration 3 hrs.

Algebra of sets. Relations, and functions. One-one functions. Onto function. Invertible functions. Composites of functions. Compositions in a set. Number systems, Statement of the basic properties of the systems of Natural numbers, Integers, Rational numbers and Real numbers as algebraic structures. Definitions with illustration of a group, a field and vector space. The system of complex numbers introduced as a system of ordered pairs of real numbers. De'Moivre's theorem and its simple applications. Relations between roots and coefficients of an equation. Evaluation of the symmetric polynomials in the roots of cubic and biquadratic equations.

Matrices as rectangular arrays of numbers. Set of matrices over a field. Algebra of matrices. Determinant as a function on the set of $n \times n$ matrices over a field to a field. Simple properties of determinants of orders 3 and 4. Multiplication of determinants. Singular and non singular matrices and the criteria for singularity. Adjoint of a matrix. Inverse of a matrix. Cayley-Hamilton theorem. Characteristic roots and characteristic vectors of a matrix. Rank of a matrix and its invariance as a result of elementary row and column transformations of a matrix. Study of system of linear equations with not more than four unknown.

(ii) CALCULUS AND ANALYTIC GEOMETRY—I

Properties of the real number system as a complete ordered field explicitly stated. Representation of real numbers as points on a line. Real functions. Co-ordinate system on a plane : Cartesian and polar. Graphs of real functions such as $y=x^2$, $y=x^3$, $y=\sqrt{1-x^2}$. Polynomial functions. Rational functions. Trigonometric and Inverse trigonometric functions. Exponential and logarithmic functions. Limit and continuity of functions defined on intervals. Discontinuities of function. Derivatives. Algebra of derivable functions. Derivatives of higher orders. Leibnitz rule Partial differentiations. Applications to tangents and normals to plane curves.

Vectors. Addition of vectors and multiplication of vectors by scalars. Scalar and Vector Products. Triple Products.

Loci represented by first degree equations. Analytical study of straight lines in a plane and of planes and straight line in space.

MATHEMATICS

Part II Examination—1980

Paper II—Calculus and Analytical Geometry 100 marks

(i) CALCULUS AND ANALYTICAL GEOMETRY—II

Primitives. Methods of obtaining primitives ;—(j) standard forms (ii) substitution (iii) integration by parts (iv) by partial fractions. Definite Integral. Reduction formulae. Definite integrals as the limit of

a sum : Geometrical demonstration of the fundamental theorem of Integral Calculus. Determination of areas by integration : Simple cases Formation of differential equations and solution of differential equations of the first order. Loci represented by the general equation of the second degree in a plane : Equations of circle, parabola, ellipse and hyperbola in standard forms. Elementary properties of these curves. Classification of curves of second degree.

(ii) CALCULUS AND ANALYTICAL GEOMETRY—III

Maxima and minima of functions of one variable. Asymptotes. Singular points. Curve tracing. Rectification and quadrature. Volumes and surface areas of solids of revolution. Simple cases of centre of gravity and moment of Inertia. Linear differential equations with constant coefficients. Homogeneous linear differential equations.

Analytical study of spheres quadric cones and cylinders

MATHEMATICS

Part III Examination—1981

100 marks

Paper III—Mechanics OR Statistics and
Real Analysis and Infinite Series.

(a) MECHANICS :

(i) Statics : Forces, Couples, Moments, Law of friction
Conditions of equilibrium of coplanar forces acting
on a rigid body. Centre of Parallel Forces.

(ii) Dynamics : Newton's laws of motion. Motions of a
particle along a straight line with uniform acceleration.
Simple harmonic motion. Projectiles Simple pendulum.
Constrained motions in a circle. Impulse, work and
energy.

(iii) Hydrostatics : Pressure at point. Resultant pressure on
plane and a curved surface. Centre of pressure on a
plane surface. Equilibrium of floating bodies.

OR

(a) STATISTICS :

Meaning and scope of Statistics. Classification and tabulation of statistical data. Histogram. Frequency polygon. Frequency Distribution Measures of central tendency. Dispersion. Skewness and kurtosis. Laws of total and compound probability. Random variables (discrete and continuous). Mathematical expectation. Binomial, Poisson and Normal Distributions. Regression and product-moment correlation. Rank correlation. Least square method of fitting regression lines. Sampling, Random sampling. Random numbers. Large sample tests for mean and proportion. Tests of significance based on T chisquare and F distribution.

(b) REAL ANALYSIS AND INFINITE SERIES :

Real numbers introduced as points of the geometrical continuum and explicit statement of their properties as complete ordered field. Sets of points Neighbourhoods. Bounds and limiting points. Open and closed sets Limits of functions and Continuity. Standard properties of continuous functions. Definition of uniform continuity and statement of the theorem that a continuous, function on a closed bounded interval is uniform continuous. Derivatives. Regorous proofs of Roll's theorem and mean value theorems. De'La Hospital Rule, Remainder term in Taylor's theorem.

Sequence and Infinite series. Sequences. Cauchy's general principle of covergence. Monotone sequences. Limits of some special sequences such as $x^n, \left(1 + \frac{1}{n^3}\right)^n, n/n$. D' Alembert's Ratio test, Rool test, Raabe's test and Cauchy's integral test for the covergence of positive term series. Leibnitz test for the convergence of alternating series. Absolute convergence of series Taylor's series. Expansion of $\sin x, \cos x, e^x$ and $\log(1+x)$ as power series.

POLITICAL SCIENCE

*Patt I—Examination—1979***Paper I—INDIAN GOVERNMENT AND POLITICS**

1. Historical background : colonialism and nationalism in India; the nature of anti-imperialist struggle.
2. Indian Constitution: its socio-economic basis and philosophy; important features.
3. Indian Constitution as an instrument of socio-economic progress.
4. Fundamental Rights and Directive Principles of State Policy; their implementation and achievement.
5. Indian Federalism; the role of the Governor.
